SUMMARY

I'm a UI/UX designer with a strong focus on layout clarity, readability, and accessibility. I enjoy crafting interfaces that are visually balanced, easy to scan, and comfortable to use across different screen sizes.

My design approach starts with understanding the structure of information and how users visually navigate a page. I pay close attention to typography, spacing, color contrast, and interaction clarity to ensure that design decisions support usability—not just aesthetics.

As a self-taught designer, I continuously refine my skills through hands-on projects and critical design thinking.
